

Please note the arches in the wall on the Embankment will lead to 'seasonal units', one arch will provide access to the proposed under podium car park and some (dependent on the design of the under podium car park) may be a façade treatment only.

The uses of the seasonal unit space/s has yet to be determined, as is their size and the total number of units, both of which are dependent on the precise size of the under podium car park which is still being worked on by the design team. We hope to provide spaces that generate activity on the Embankment, which reflects the site's riverside setting.
